"The clock will have your breakfast ready"

She will be sleeping soundly when the clock on the automatic natural gas range starts his breakfast cooking. When he is dressed for his fishing trip, a piping hot meal will be ready for him.

Almost any food can be cooked, from start to finish, without attention. The clock turns the gas on and off, automatically. The oven heat regulator automatically governs oven temperature.

Oven insulation and new type burners make natural gas cooking even more economical than before. Cooking costs as little as a quarter of a cent a person a meal.

Look for the Blue Star Seal of the American Gas Association Testing Laboratory on the new ranges in the display of your dealer or gas company.
